“FULL STEAM AHEAD”

CANADIAN PACIFIC 2816 UNDER FULL POWER TRAVERSING THE ROCKIES

Steaming out of the past comes CP 2816 Empress steam locomotive. The resurrected locomotive 2816 re-entered active service in 2001 as a roving ambassador for Canadian Pacific.

CP's 2816 is a class H1b Hudson type locomotive built by Montreal Locomotive Works in December 1930. The CP Empress is now the only surviving H1b Hudson and is one of only a handful of preserved and operating CPR steam locomotives in North America.

Today, after a complete three-year rebuild, 2816 is restored to the original specifications with external details from the 1940/50s. *
